

SUBMITTAL: MODEL CTW™ FLUSH ACCESS PANELS

An Access Panel with a Recessed Door and Wallboard Bead Frame for Walls or Ceilings - *NEW HEAVIER CONSTRUCTION STANDARD!*

For the most unobtrusive appearance, the CTW Series is designed for an inset of gypsum wallboard to cover the door panel with exposure of only the narrow frame edges. Door is recessed to accommodate up to a 1/2" drywall insert. Attach the wallboard to the door with adhesive and ensure that it is flush with surrounding wallboard.

A continuous hinge located at the outside edge of the door, ensures easy opening of the panel. Wallboard bead allows smooth finish to edge of frame.

Panel shown partially-covered by wallboard at right
