

# SUBMITTAL/TECHNICAL DATA SHEET

## DESCRIPTION

This access panel consists of a welded high grade aluminum outer and inner frame than is bonded together with a special welding process. This access door is available with either a 1/2" (12.7mm) or 5/8" (15.9mm) drywall inlay depending on your application.

For easy opening and closing it comes standard with pressure sensitive touch latches, and for added security you can add a lock for an additional fee. For all access door sizes over 12" (305mm) our panels are equipped with a safety-system to prevent accidental openings, this safety system must be re-secured after each use.

Once installed and finished the panel is virtually invisible as the frame, latch and hinges are concealed from the inside, and only a reveal of 1/16" (1.59mm) is visible between the frame and the access door. This access panel also are equipped with a foam perimeter seal.

## FEATURES

- Concealed touch latch
- Open hinge, removable door
- Fits 5/8" (15.9mm) drywall
- For non-rated walls & ceilings
- Aluminum frame & door structure
