

SUBMITTAL/TECHNICAL DATA SHEET

SPECIFICATIONS

BILCO basement doors are available in two basic styles: doors for sloped masonry sidewalls (shown here) and steel sided doors for areaways with a flat foundation.

BILCO Type BR Sloped Wall Doors are now offered with a factory-applied polyester powder coat finish. The polyester resin provides a durable, weather-resistant coating. Cured at higher temperatures than most wet coatings, the result is a tougher and chip-resistant coating, providing both a decorative and protective finish.

IMPORTANT

The BILCO Type BR Sloped Wall Door will operate with ease and provide years of trouble-free service when installed level and square and firmly anchored to a sound foundation. Each sloped foundation sidewall should be structurally sound, with no loose or crumbling masonry, have a uniformly flat and level surface on which to anchor the door, and be uniformly level with the opposite sidewall. The sill should be 2" to 4" above grade. If repairs are needed, they should be done before the door is installed. If the sidewalls must be removed, BILCO doors are available complete with steel sidepieces.

DIMENSIONS AND APPEARANCE

>> CLICK TO VIEW ADDITIONAL DETAILS AND PRICING <<

Selecting The Correct Size Basement Door:

Step 1.

1. Discard the old door and measure (in inches) the dimensions of the existing areaway foundation.
2. Measure dimension **W1**, the inside width, and dimension **W2**, the outside width of the areaway foundation.
3. Measure dimension **L1**, the inside length, and dimension **L2**, the outside length of the areaway foundation.

Step 2.

Record the dimensions in the spaces provided and calculate as shown at right.

Width Length
W1 = _____ W2 = _____ L1 = _____ L2 = _____

Step 3.

Select a model whose inside door width is equal to or more than W1 and less than W2. Door length should be at least 2" longer than L1 and no longer than L2. Door length can be extended for all sizes with Bilco Extension Panels. Two or more extensions can be used, simply overlap them at least 1". Foundation Plates can be used to reduce the opening if your W1 measurement is wider than the BR door inside width. Foundation Plates may also be used to widen the outside measurement (W2) of the foundation to accept a BR door.

CALL FOR ASSISTANCE ON CHOOSING THE SIZES.

Model	Door Width		Door Length				
	Inside	Overall	Inside	Overall	Overall - With Extension Panels		
					6" Ext	12" Ext	18" Ext
BR-1	36"	43-3/16"	58"	65-1/8"	70-1/8"	76-1/8"	82-1/8"
BR-2	40"	47-3/16"	60-1/4"	67-5/8"	72-5/8"	78-5/8"	84-5/8"
BR-3	44"	51-3/16"	67-3/8"	74-1/2"	79-1/2"	85-1/2"	91-1/2"

Extensions are available to increase the door length in 6", 12", and 18" sizes. Two or more extensions can be overlapped to make longer extensions.

Note: Extension panels must overlap the door's header panel by a least 1". Refer to table above for door lengths with extension panels.

BR-1 BASEMENT DOOR WITH SLOPED MASONRY WALLS

BASEMENT DOOR ACCESSORIES:

Foundation Plates

BILCO Foundation Plates are installed on top of areaway foundation sidewalls to:

1. Improve the appearance of old areaway foundations and sloped sidewalls.
2. Cover rough masonry and small holes, and span voids in brick and concrete block.
3. Reduce inside width of areaway rough openings to fit BILCO doors.
4. Support BILCO doors in corner installations.

Extensions:

Classic Series extensions are available for Size C doors in 6", 12", 18", 24" and 30" lengths and two or more can be mounted back to back to increase the door length. Ultra Series extensions are available in 6" and 12" lengths and two extensions can be combined to increase the door length.

Stair Stringers:

Constructed of 14-gauge galvanized steel, BILCO stair stringers are an economical way to add a staircase to any existing basement areaway. To determine the stair stringers required, measure the height of grade above the finished basement floor (H) and length (L) of your areaway opening. Select the proper stair stringers from the table to the right.

Model	Length	Width	Height
FP5	72"	5"	1-3/4"
FP8	72"	8"	1-3/4"
FP11	72"	11"	1-3/4"
FP14	72"	14"	1-3/4"

Foundation Plates

Extensions

Stair Stringers

Keyed Lock Kit

Weather Strip Kit

BASEMENT DOOR	STAIR STRINGER		
	Model	Run + in Areaway	Number of Stair Treads
Size SL	Size SL-SS	34-5/8"	4
Size O	Size O-SS	51-5/8"	6
Size B	Size B-SS	59-3/4"	7
Size C	Size C-SS	68-1/8"	8
Size C	Size E-SS	26-1/4"	3

Multiple stringers can be used together and extensions (SZ-E-SS) are also available for non-standard areaways. Extensions are 25-1/4" in length and add 3 stair treads.

Keyed Lock Kit:

Enjoy the convenience of locking and unlocking your BILCO basement door from the outside. A turn of the key opens the door from the outside and a handy release lever automatically unlocks the door from the inside. The BILCO keyed lock kit is designed for installation in less than 30 minutes.

Weather Strip Kit:

BILCO's weather strip kit is easy to install and includes a series of gaskets specifically designed to seal the intricate shape and areas of a basement door. The kit is supplied with complete installation instructions and the only tools required are tin snips or large scissors. Simply trim the materials as instructed to match your specific door model (possibly even other brands of steel basement doors) and enjoy your well-sealed areaway. This product is not applicable for the Ultra Series.
