SUBMITTAL/TECHNICAL DATA SHEET

DESCRIPTIONS

The GF series of lightweight glass fiber reinforced gypsum access panels are designed to blend seamlessly into drywall ceilings and walls with the minimum of visible lines.

These panels are manufactured from a 70% post-consumer recycled glass for a unique green-design matrix designed to blend seamlessly into your walls and ceilings.

SPECIFICATIONS

The assembly consists of a surround frame and either a drop down or hinged door. These seamless access door panels are perfect for jobs where access is required at regular intervals.

Panels are lightweight and easily textured for new or retrofit applications and feature a tapered edge for a smooth tape joint. The smart design helps contractors work smarter, faster, and better with deeper tapered edges, level 5 finish, pre-countersunk locations with superior plywood embedments for addition mechanical strength resulting in drywall joints that won't shrink, crack, or sag.

Fuel Contribution (ASTM E84-80): 0, Flame spread (ASTM E84-80): 0, Combustion (ASTM E84-80) Non-combustible.
