

SUBMITTAL/TECHNICAL DATA SHEET

ADVANTAGES

- An expanded metal casing bead, included as part of the frame, provides a neat, protected finish between frame and plaster, while furnishing added plaster reinforcement.
- The door panel finishes flush with plaster surface, making an unobtrusive installation when painted, to match the wall or ceiling.
- The door panel is mounted to the frame with concealed spring hinges that open to 175 degrees for complete access without allowing the door to impact surrounding surface.
- Available in brilliant white, stainless steel and galvanized steel. Optional primed colors also include grey powder coated steel, gold sand and jet black.

SKU: **K**
